

Get **FACTORY I/O**

You might realize that the **FACTORY I/O** is such an amazing tool to learn PLC Programming. I have a good news that FACTORY I/O has upgraded their software with many new features and they are now offering:

Monthly Subscription for as low as 15€/month

Click here to get your license now:

<https://factoryio.com/>

To interface FACTORY IO with Siemens TIA Portal you need Siemens PLC with Ethernet or just PLCSIM if you don't have PLC!

P.S. If you using crack version of FACTORY I/O, you will not get all the new features and I am really against using pirated software. If you look at the price, 15€/month is not a big price. Just get yourself a license and start using all the features.

Cheers!
